Mr. David Cox, Permits Section
Bureau of Waste Management
Kansas Department of Health and Environment
Forbes Field, Building 740
Topeka, KS 66620-0001

Re: **Closure of Shredder and Granulator Sub Part X Units**
Safety-Kleen (Wichita) Inc., EPA ID. Number KSD 007246846

Dear Mr. Cox:

The Closure of these units, which were removed from our RCRA Permit in the Class 1 Modification of August 25, 1998, has been completed as required by the Partial Closure provisions of Section J of Part B of our Hazardous Waste Permit Application.

The final waste material was removed and samples were taken on November 12, 1998. The samples were analyzed as required by Section J, and the results of the analyses were reported to us today. All analytes were below regulated levels.

Thank you for your assistance in this matter. Please call me if you have any questions.

Sincerely,

Ronald K. Robertson
Facility Environmental Manager
